F.E. MORAN SPECIAL HAZARD SYSTEMS EXCEEDS INDUSTRY STANDARD SAFETY RATING

Provides Reduced Risks to Workers in Special Hazard Environments

Northbrook, IL – F.E. Moran Special Hazard Systems has achieved an Interstate Experience Modification Rate (EMR) of .73; a score that is significantly better than the industry standard. The rating was determined in accordance with guidelines set forth by the National Council on Compensation Insurance's (NCCI) EMR calculation process.

High-risk, high-value environments such as power plants, chemical plants and heavy industry locations pose an elevated risk to workers, increasing the significance of maintaining a stable EMR. These types of settings typically seek contractors who possess an EMR that surpasses industry standards to ensure that best practices are employed on the job site.

F.E. Moran Special Hazard Systems utilizes an in depth safety program that is designed to preserve the safety of all individuals involved in every project, with an objective of zero incidents. Integral constituents of the program include: job hazard analysis, electrical safety, fire protection, fall protection and personal protective equipment. Brian Ramsey, President of F.E. Moran Special Hazard Systems, says "We are proud of this rating and are always working towards continuous improvement. Our priority is protecting people, plant and production and this rating supports our emphasis." Ramsey attributes the success of the program to stringent enforcement of established safety methods on a consistent basis: "Throughout the course of a project, supervisors, employees and subcontractors participate in daily planning and weekly training meetings in which potential job hazards and appropriate safety procedures are thoroughly examined. Additionally, it is protocol for new hires to have extensive safety training to ensure that all employees are educated in the importance of executing proven safety practices."

F.E. Moran Special Hazard Systems provides comprehensive fire protection solutions for heavy industry environments such as chemical and power plants. Extensive knowledge of design methodologies and current codes along with consummate installation tactics provide customers with dependable turnkey solutions that satisfy their specific needs. As an industry leader with over 30 years of experience, more than 700 high-risk facilities across the globe have trusted F.E. Moran Special Hazard Systems to implement and maintain flexible, reliable fire protection systems.
