F.E. MORAN SPECIAL HAZARD SYSTEMS EXPANDS TRAINING MODULES FOR ENHANCED FIRE PROTECTION SYSTEM EDUCATION

Northbrook, IL – F.E. Moran Special Hazard Systems has announced updates to its plant staff training modules to include training videos providing detailed demonstrations of inspection, testing and maintenance processes. These supplements to F.E. Moran's training program were added to provide a more comprehensive training curriculum for power generating plants. Brian Ramsey, President of F.E. Moran Special Hazard Systems, says "The ultimate goal of our training program is to provide power generating plants with an all-encompassing tool that enables plant staff to achieve a level of knowledge that allows them to cost-effectively perform inspection, testing and maintenance work internally. Our experienced trainers develop a program that works with site-specific O&M manuals for plants, and impart their unparalleled expertise upon facilities that are seeking to reduce dependency on outside providers, enhance plant-staff knowledge of their fire protection systems and assure fire protection system functionality."

F.E. Moran Special Hazard Systems provides comprehensive fire protection solutions for heavy industry environments such as chemical and power plants. As an industry leader with over 30 years of experience, high-value/high-risk facilities across the globe have trusted F.E. Moran Special Hazard Systems to implement and maintain cost-effective, reliable fire protection systems.
